Novels in verse are few and far between in India. Let's look at this emerging form and examine why authors and readers enjoy it.

Portal Fantasy

A wardrobe, the Faraway Tree, a Portkey, or even a strong gust of wind—all these have served as gateways from one world to another in literature. With a reading from *Uncontrollable*, let's explore how we can make the feeling of going through a portal come alive to the reader, before going on to create a fictional portal of our own.

AUTHOR INTERACTIONS

Meeting and interacting with authors and illustrators expands horizons. Especially when schools want children to develop the habit of reading, they must create an atmosphere that makes reading exciting. Literature fests and author events go a long way in making this happen. When schools encourage children to read an author's books before an interaction, the children are eager to share their reviews, questions and perspectives. Additionally, when schools make copies of an author's books available for purchase either before or after an author visit, children race to get autographs, making reading a thrilling escapade. This creates a reading culture in the school, which can take children a long way on their individual journeys with books!
